# Southeast Asian End-User Industries Pose High Demand for Advanced Technologies and Bio-based Materials

Attractive investment incentives, high consumer spending, rapid urbanization, competitive operational costs and favorable business environment are pushing Southeast Asia countries ahead of their league in the plastics and rubber industrial sector. The region is expected to overcome market challenges in the coming years but its resiliency has been its greatest asset – and this has been very much visible in its manufacturing industries. Southeast Asia's plastics market size, estimated at 31.7 million tons (MT) in 2025 is projected to grow by more than 4% annually up to 2030 to reach 38.6MT. Other projections place the market size value from US\$46.3 billion in 2023 to around US\$68.2 billion by 2031. Rising demand from end-user industries such as packaging, automotive, construction and medical sectors is expected to push demand for plastics and rubber.

Food and beverage packaging will remain the driving force behind the growth of plastics demand in Southeast Asia. Dominating the region's packaging industry is Indonesia which is seen to grow by more than 6% yearly. Other dynamic players in the packaging sector are Thailand, Malaysia and Vietnam – whose fast-rising consumer spending augurs well for the packaging sector. The automotive industry in Southeast Asia is fast moving towards electrification as countries witness increased electric vehicle sales. An estimated revenue of over US\$6 billion in 2026 and a market volume of US\$7.7 billion by 2029 placed the region as the fastest growing at more than 10% in terms of EV adoption. In this sector, Indonesia has seen tremendous expansion in automotive production, while Thailand and Vietnam are not far behind as they serve as production hubs for global automotive players. Southeast Asian countries are bringing building and construction into new height as rising urbanization and expanding middle class push demand for both commercial and residential projects. Robust construction activities in Indonesia, Thailand, the Philippines, Malaysia and Vietnam are taking advantage of the huge investment influx into this sector. The consumer electronics market in Southeast Asia posts an annual revenue of more than US\$50.2 billion, demonstrating high demand for advanced smart consumer electronic devices. In the medical devices sector, the region is poised to grow annually by more than 8% with market volume of US\$17.6 billion by 2030. Countries in the region have recognized the importance of medical devices in the delivery of modern healthcare services to the populace. These dynamic end-user industries are expected to fuel demand for performance plastics and high-end technologies that will enable smart, energy-saving and efficient manufacturing operations.

As a lucrative market for injection molding products, Southeast Asia is also seeing growing usage of intelligent injection molding systems. The region is also putting into good use high end extrusion machineries capable of processing multimaterial plastics. With circular economy being a predominant theme in the plastics industry, sustainability will be emphasized as manufacturers continue their quest for biodegradable alternatives and effective recycling processing machines. In the same vein, opportunities for environmentally-friendly plastic materials, such as bioplastics, are expanding as this material is now widely accepted in various end-user industries that are aiming to raise their recycled plastic content in their finished products. Thus, Singapore, Indonesia, Thailand, Malaysia, and the Philippines are driving demand for bioplastics to new heights and this scenario will persist in the next few years.

For more than 17 years, **International Plastics News for Asia** has established itself as a leading source of exclusive content and technical articles for the plastics and rubber industry in the Asia Pacific region. Prepared and written by a team of industry and editorial experts from Ringier Trade Media, the bi-monthly print and digital magazines and industry vertical reach decision-makers in Asia Pacific's plastics processing companies, contract molders and manufacturers with in-plant machinery lines.

For suppliers, **International Plastics News for Asia** is an effective multimedia platform which provides the latest information on their products and services. Through a dedicated Plastics and Rubber vertical ([www.industrysourcing.com/plastics](http://www.industrysourcing.com/plastics)), the industry community can find daily news updates and exclusive online features, videos and reports on major industry events – including live updates from major industry trade shows as they happen – to keep the industry stay informed.

E-newsletters including **Circular Economy, Auto manufacturing- Plastics and composites** featuring headline industry news, trade show coverage, and analysis and market reports keep you linked to the industry.

This multiple delivery channels enable you to get the most benefits from interactive magazines Apps with video links on iTunes and Google Play, plus technical articles and reports from Ringier's family of Plastics magazines covering the Greater China.

## 2026 CONFERENCES FOR PLASTICS INDUSTRY

Ringier organizes high level technical and business conferences bringing industry leaders together for information exchange and networking opportunities in the plastics industry.

- Plastics Innovative Materials Application & Processing Technology Congress 2026  
 Concurrent Event: Ringier Technology Innovation Awards 2026- Plastics Industry(Mar ,Shanghai China)
- 2026 ASEAN High-Performance Machining Summit —Autoparts, Electronics, Assembly automation(Mar 10-11,Ho Chi Minh, Vietnam)
- Advanced Manufacturing Industry Development Conference 2026(Apr,Chengdu China)
- 2026 ASEAN Manufacturing Summit: Advanced Manufacturing of Consumer Plastics & Electronics(July.8-9,Kuala Lumpur, Malaysia)
- 2026 eVTOL Key Technology and Manufacturing Industry Development Conference(Jul .,Chongqing China)
- Humanoid Robot Precision Manufacturing and Materials Innovation Forum 2026(Oct. ,Shanghai China)
- 2026 ASEAN Advanced Automotive Manufacturing Summit - Flexible Production & EV Solutions(Nov. 3-4,Cikarang, Indonesia)

Editorial content, trade show and conference schedule subject may change without notice.

## Industry and Magazine e-Newsletters

Scheduled industry and magazine e-newsletters targeting specific industries, job functions and decision making responsibilities in China and S. E. Asia deliver relevant news to industry leaders or engineers throughout the year providing insightful and valuable content that readers rely on. It brings your message to the place your target audience visits most – their inbox. Generate immediate response and website traffic by promoting your key products and services by direct communications with your core target audiences.

## EMAIL MARKETING

"Personalized" email allows you to focus your online marketing efforts to a highly targeted geographic and/ or demographic segment of contacts in our database. Full reporting metrics provided. Privacy compliant.

## WEBINARS

Webinars are a powerful way to share your industry expertise and position your company as a thought leader in front of your industrial community.

Ringier Webinars provide a content-rich learning experience to your prospective buyers. Events are interactive. Moderators ask and answer questions fully engaging the attendee through a Q&A session.

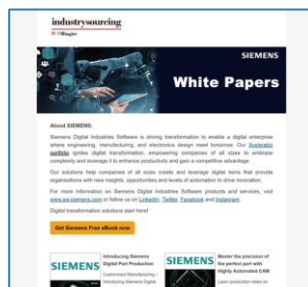

## SOCIAL NETWORKS - WECHAT

Present your company effectively - Use Ringier Social Networks sponsored posts, reach buyers as they're scrolling through social networks. Drive traffic from the biggest and most popular social media.

## WHITE PAPER

Ringier includes your white paper in industry e-newsletters, supplier website and feature item on the homepage of [industrysourcing](https://industrysourcing.com) and related vertical website homepages. In addition, your white paper can be noted in ringier's magazines next to related editorial.

## SMS

Send text messages about your latest product or company news directly to your target clients' cell phones!

## VIDEO

Video is one of the most versatile and profitable digital marketing tools. From assisting you recording and editing high-quality videos, to broadcasting your events to help you get more exposure at the big trade show, we are here.

SINCE 1998

From print media to integrated multimedia solutions **Ringier Trade Media Ltd** has consistently been a front runner in the application of new communication technologies. As a leading B2B industrial information provider, the company has successfully promoted industrial development since 1998. With a focus on quality content, industry knowledge, excellent service to the communities we serve our various media channels connect and engage with industry experts, suppliers and users.

**Ringier Trade Media** has been shaped by its commitment to innovation, and meeting the needs of customers & readers.

知链公关 PR-Shanghai Smart Link Consulting Company Ltd. (SLC)

PR or "below the line advertising" that tells stories, positions companies as industry/thought leaders is clearly a growing effective form of communication - Our PR experts can help put a program together for you.
